

LIST OF ONLINE BUSINESS IDEAS

THE BENEFITS OF AN ONLINE INTERNET BUSINESS

When you compare any online digital business to its brick-and-mortar retail equivalent, you'll understand why tens of millions of people all over the world take the online route instead.

Owning a “real” business means you need to think about bank loans or financing, leases, maintaining inventory, business insurance, finding staff, training staff, etc.

You then need to factor in finding a prime location for your business. If you don't have enough footfalls then you can expect to be shutting up shop in as little as a few months. In fact, 50% of small brick-and-mortar businesses fail within their first 3 years.

Some of the things we love about pretty much any online business model out there include:

- Low startup costs
- Almost non-existent overheads
- Can be run from anywhere in the world
- Can be run part-time
- No staff required, unless you choose to

If you can find any ethical and legal brick-and-mortar retail business you can start with exactly nothing, then we'd love to hear about it. Oh, and that doesn't include the “no money down” property flipping model.

Internet business opportunities are more accessible and available now than ever. There is nothing preventing you from getting started... just you!
